

HM Electronic Equipment Co., LTD offers Honeycomb Vent EMI/EMC shielding ventilation panels. Available in a wide choice of materials, platings, and mounting configurations. We offer the EMC/EMI engineer new versatility to meet EMI EMC, environmental, and mechanical requirements of system specifications.

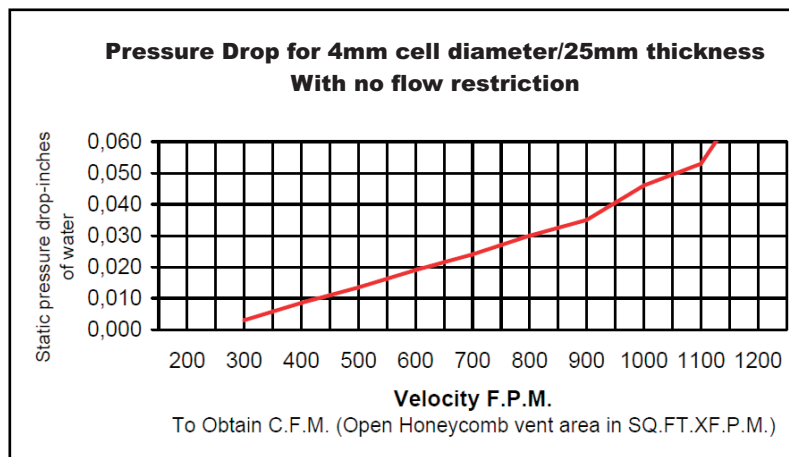

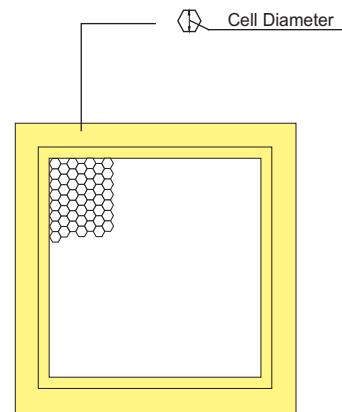

HM Honeycomb Vent Advantages:

- * Widely choice of core materials and finishes to meet broad range of shielding effectiveness requirements
- * Widely choice of frame materials
- * Thickness is available from 5mm to 120mm
- * Cell diameter is available from 2.5mm/3.2mm/4.0mm/5.0mm/8.0mm
** Other size for the cell diameter is available too for special order
- * Full test of honeycomb vent to MIL-STD-285 to aid in the early stages of equipment panel design
- * High performance with the reasonable price
- * The choice of many famous company around the world
- * Customize base on customer requirement

Technical Parameter

Thickness: 25mm Cell Diameter: 4.8mm
 Material: Tin plated steel
 Cell Foil Material: Tin plated Steel Roll
 Cell Foil Thickness: 0.15mm
